

Rutland Lions Park

The City of Kelowna will soon begin the design of two parks projects in Rutland: a *new* neighbourhood park on **Aurora Crescent** and improvements to the *existing* **Rutland Lions Park**. We would like to hear from you to understand more about the community's needs, values and priorities for these two upcoming projects. Please review the information below and on the adjacent panels to learn more, and complete the survey to provide valuable feedback that will help to inform the design of the parks.

Have your say! Tell us what is most important to you for the upcoming design of Aurora Park and improvements to Rutland Lions Park.

Please scan the QR code or visit getinvolved.kelowna.ca/parks to take the online survey.

PARK LOCATIONS

AURORA NEIGHBOURHOOD PARK

Aurora Park will be a new neighbourhood green space that will be developed in the core of rapidly densifying and evolving Rutland Town Centre. The park site is 0.34 of a hectare in size, or 0.83 acres. It will serve approximately 2000 residents within a five minute walk.

RUTLAND LIONS PARK IMPROVEMENTS

Rutland Lions Park is an existing park in the heart of Rutland. Improvements to the park are being planned in conjunction with the development of the adjacent future Rutland Lions Activity Centre. As a community park, it will be designed to serve approximately 12,000 people within a 3km radius.

AURORA PARK DESIGN & CONSTRUCTION TIMELINE

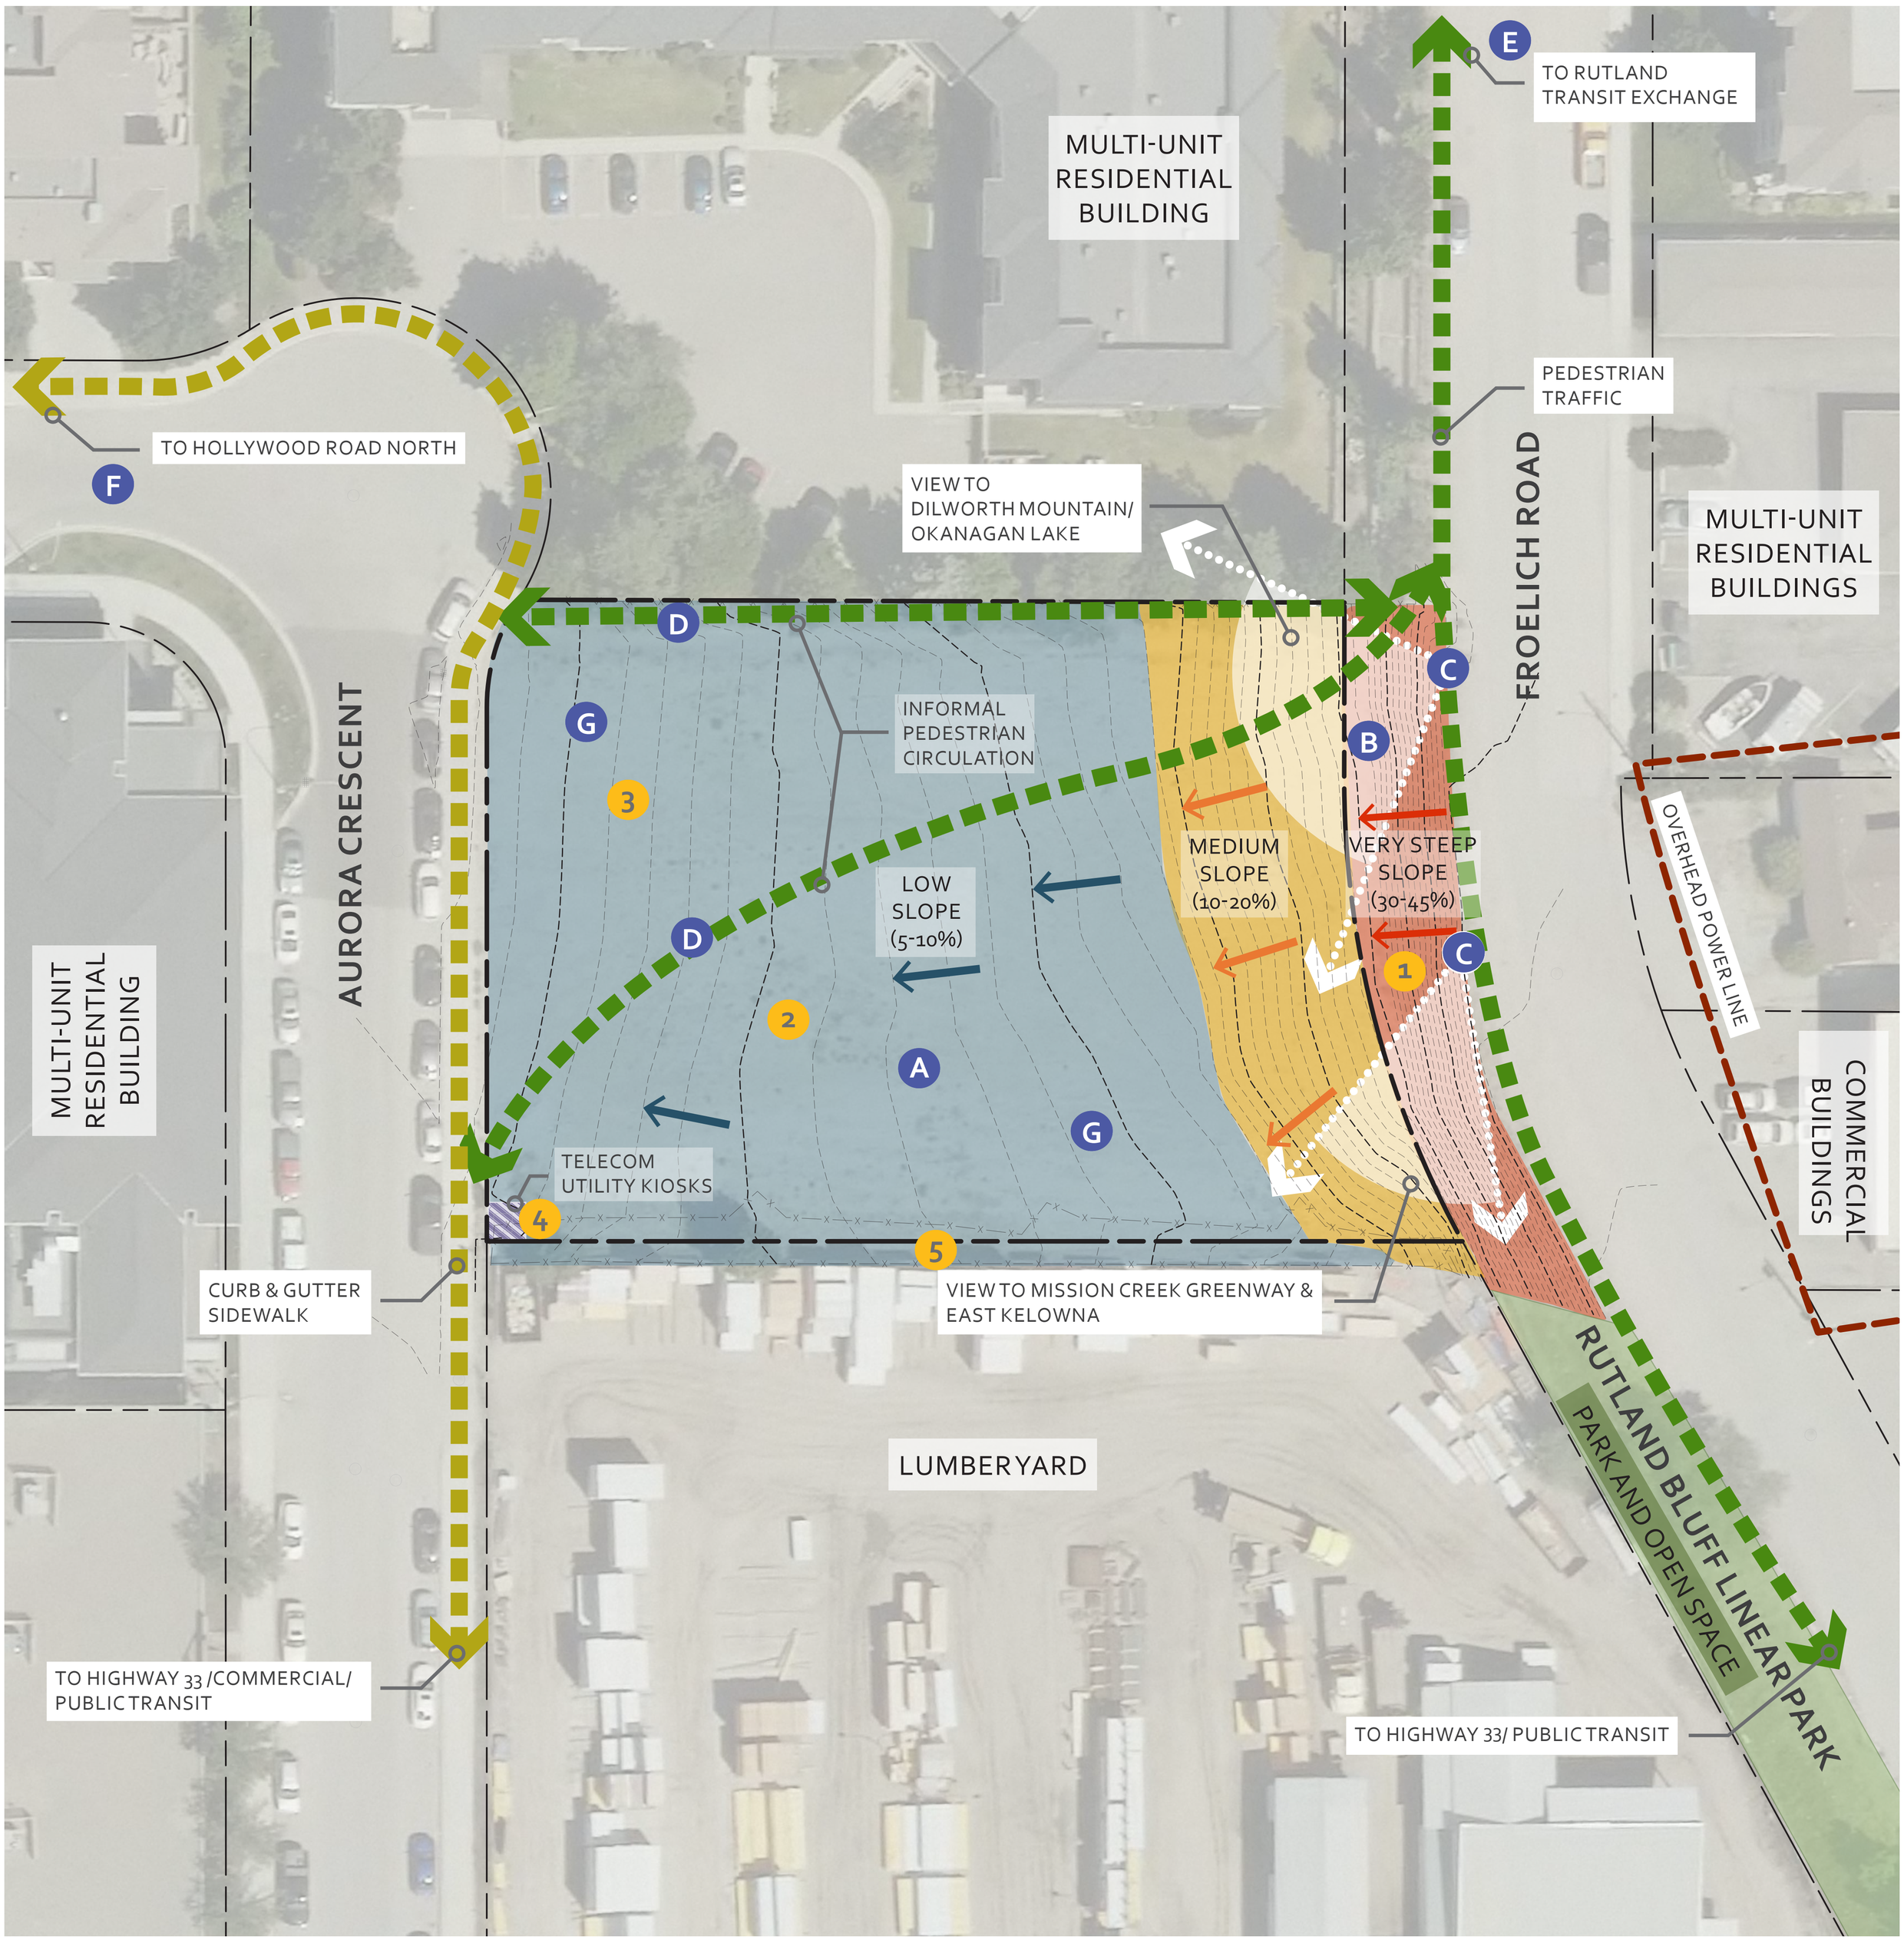

WE ARE HERE

PRE-DESIGN ENGAGEMENT	CONCEPT DESIGN	DETAILED DESIGN & CONSTRUCTION DOCUMENTS	CONSTRUCTION
June - July 2025	*August - October 2025*	*November 2025 - March 2026*	*Summer - Fall 2026*

RUTLAND LIONS PARK IMPROVEMENTS DESIGN TIMELINE

WE ARE HERE

June - July 2025	*August - September 2025*

Constraints & Challenges

1. Very steep slope on east side of park makes accessibility challenging
2. Presence of noxious weeds
3. Existing soils are highly compacted
4. Utilities on park property
5. Existing security adjacent to fence at south edge

Assets & Opportunities

- **A** Very few constraints; the site is nearly a blank canvas...
- **B** Steep slope provides an opportunity to incorporate playful elements
- **C** Views from the top of slope to East Kelowna and Dilworth Mountain
- **D** Potential to formalize and improve a pedestrian route between Froelich Road and Aurora Crescent
- **E** Proximity to Rutland Transit Exchange
- **F** Line of sight to Hollywood Road
- **G** Lots of open space provides potenital to incorporate large-canopy, long-lived trees

POTENTIAL FUNCTIONS & AMENITIES CONCEPT

POTENTIAL FUNCTIONS & AMENITIES

AURORA PARK | PUBLIC ENGAGEMENT

City of Kelowna

Constraints & Challenges

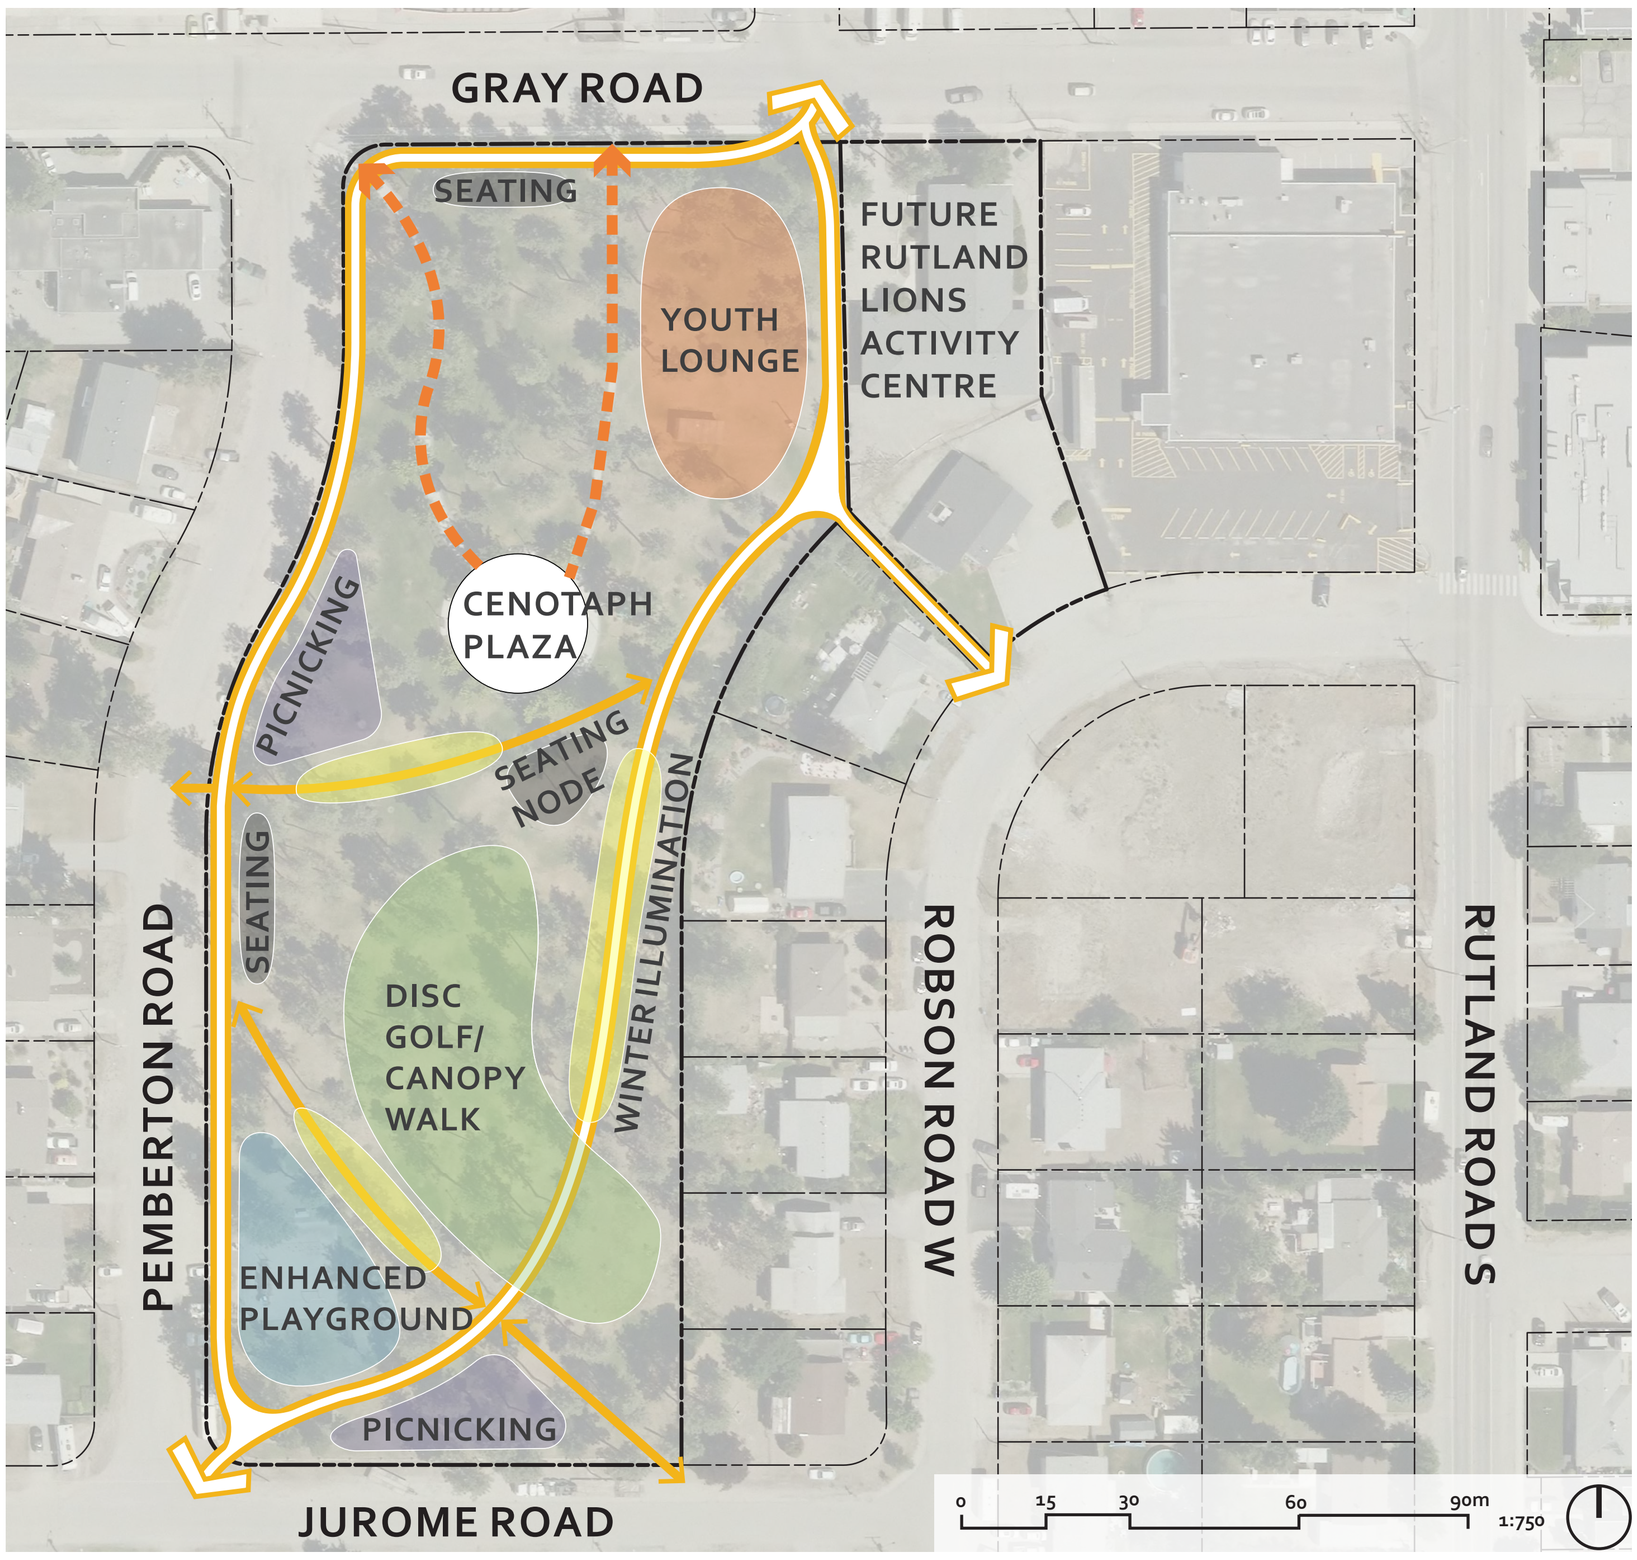

1. Closed washroom building
2. Portions of the park are not well activated
3. Long, fenced edge creates poor sightlines and perceived security challenges
4. Absence of accessible pathways throughout the park
5. Cenotaph is an important gathering area for Remembrance Day ceremonies but is not well used at other times of year
6. No designated accessible parking

Assets & Opportunities

- **A** Mature trees provide shade, habitat and create a distinctive character for the park
- **B** Cenotaph is an important focal point; opportunity to activate year-round
- **C** The park's large size and unprogrammed spaces provide opportunity to sensitively add new amenities and functions to meet the needs of a growing community, without compromising its existing character
- **D** Future Rutland Lions Activity Centre will create an animated edge and opportunity for synergy with park amenities
- **E** Level topography allows for the addition of accessible pathways with little disturbance to the site
